

Wall covering profiles

Practical and decorative, economical and durable: PROFILITEC Wall Covering Profiles are a first-rate solution for detailing mosaic, natural stone and all wall tile installations.

Linear profiles are designed to provide edge protection for tile coverings. It provides vertical protection. It's versatility for floor or wall applications deletes the need for special tile edges or the need to cut 45 degree tile for edge terminations. PROFILITEC proposes solutions with our Internal and External wall corners, providing ease of use and maintenance.

Safe option to sharp mitre edges

Available in synthetic, non-toxic materials, brass, aluminum and stainless steel profiles in over 30 trim finishes allow the designer to coordinate or contrast tile and grout colors. The end result is a completely integrated design environment.

squarejolly SJ

SQUAREJOLLY SJ is a multipurpose aluminum profile used in laying adhesive ceramic floor and wall coverings. Its uniquely symmetrical shape lends itself to endless detailing possibilities. In the technical specs, H corresponds to the tile thickness and $B = H + 1$ mm corresponds to the visible width of the profile. In the aluminum version, a patented internal cavity with a dovetail groove maximizes vertical grout grip and edge protection. The sectional design of the SQUAREJOLLY SJ profile provides a completely leveled surface, making it resistant to vertical loads and perfectly suitable for flooring applications.

filojolly RJF

The patented FILOJOLLY profile is specifically designed for outside edges, minimizing the metal reveal. Designed for mitered tiles cut at a 45° angle or for square 4.5mm glass mosaics, the result is an almost invisible outside edge detail.

roundjolly RJ

The ROUNDJOLLY profiles connect floors of different levels, completing and protecting the tile edge from bangs and mechanical impacts. The profile, available in aluminium and stainless steel, is ideal for restructuring and on surfaces covered with thin tiles.

roundjolly RJE

The patented closed-section version of the ROUNDJOLLY family is developed with cutting-edge co-extrusion technology which combines two polymer synthetic resins. The result is complete control over the visible surface, maintaining its mechanical resistance and aesthetic qualities. The trim profile section aligns along the tile and protects the edge from impact. It is a safe alternative to dangerously sharp external tile corners.

RJE100P11

roundjolly RJS

The patented closed-section version of the ROUNDJOLLY family is developed with cutting-edge co-extrusion technology which combines two polymer synthetic resins. The result is complete control over the visible surface, maintaining its mechanical resistance and aesthetic qualities. The trim profile section aligns along the tile and protects the edge from impact. It is a safe alternative to dangerously sharp external tile corners.

trimtec TR

TRIMTEC TR is a complete range of brass, aluminum and stainless steel trim profiles designed for fast and efficient installation of any flooring type, regardless of size and thickness. TRIMTEC TR is available in various heights from 2 to 30 mm, matching different tile thicknesses. In the aluminum and brass versions, a dovetail groove maximizes the grout grip and edge protection for both vertical and horizontal tile laying. TRIMTEC TR profiles are conceived for tile laying, but can also be used with other types of flooring such as stone, wood and industrial resin floors. TRIMTEC TR profiles are mainly used as transition trims between two types of flooring (for example between tiling and carpeting) and as expansion joints when two lengths are laid side by side. They can also be used as trimming for ceramic baseboards and as edge protection for any floor thickness. In some cases the profiles may be used as entrance mat framing.

kerajolly KJ

KERAJOLLY profiles are designed to define sharp external wall corners and prevent chipping and cracking of fragile single-fired ceramic tiles. Easy to install, simply choose the size based on the thickness of the selected tile. KERAJOLLY trim profiles protect ceramic tiled wall corners against impact while guaranteeing safety standards and durability. The KERAJOLLY color range can also be matched with LISTEC decorative strips, proposing endless design possibilities.

mosaitect

SJM

MOSAICTEC SJM is a multipurpose profile to match floor and wall coverings or used as edgings or decorative listellos, with a perfect symmetry of the 2 visible sides. This profile has been specially conceived for thin floors and mosaics, its reduced wing size and thickness is designed to provide the perfect solution for the neat finishing of mosaic tesseras, ensuring a neat, level surface finish. MOSAICTEC SJM belongs to a complete series of solutions for mosaics. A special cubic end cap is available, multipurpose to match with all installation needs.

sanitec SB10

SANITEC SB10 is a hygienic, anodised aluminum internal cove, suitable for use in the food industry, public places and areas subject to frequent cleaning (kitchens). The profile is applied before the floor and wall covering is laid, perfectly integrated into the wall. For tile thicknesses up to 4.5 mm, it is used alone, while for greater thicknesses it is combined with Trimtec TR and Kerajolly KJ profiles. Thanks to the special curvature and the resistance characteristics of the material used, it guarantees hygiene and cleanliness in internal corners between walls or between wall and floor. It is therefore ideal in public areas meeting hygiene regulations.

SB10AS + TR100AS

Length: 2,70 meters

SB 10 - Aluminum
R = 10 mm

SB 10 + TR - Aluminum
R = 10 mm

The SB10 can be used alone, for 4.5 mm thick tiles, and in combination with the TR or KJ profiles for greater thicknesses.

roundcorner RE

ROUNDCORNER RE is a rounded corner profile conceived to protect exposed external tile corners. The profile is installed on site, laying the tile flush against the perforated flanges and creating a perfectly leveled corner. Typically used in heavy trafficked areas in public spaces such as hospitals, food processing plants and public bathrooms.

coflex CR

The patented COFLEX CR series optimizes the angular connections between floors and walls, guaranteeing the right expansion, creating a hygienic connection for cleaning and creating an acoustic cut to interrupt the propagation of noise between contiguous structures. COFLEX CR consists of a basic module in rigid/soft coextrusion (Art. CR 16) and additional modules (Art. KJ series) which fit inside the basic module, creating the height required by the thickness of the tile and guaranteeing the perfect fixing with the coating. By inserting the KJ in the rail of the CR16 coving there is an increase of 2 mm: for this reason the KJ profiles must be ordered 2 mm smaller than the thickness of the tile.

sanitec IC25

Conceived as hygienic wall-to-wall or wall-to-floor transitions, SANITEC IC cove-shaped profiles meet hygiene standards in public spaces subject to sanitary inspection, such as hospitals, food processing plants, industrial kitchens and public bathrooms. Ideal for retrofit applications in public building renovations. The slightly rounded edges seal the profile onto the surface. Use our adhesive for on-site installation. The H=60mm version also acts as a baseboard.

IC25IL

Length: 2,70 meters

Stainless Steel
R = 16 mm

It is recommended to use FIXXTEC multipurpose adhesive to bond the product. For further information, see page 302.

sanitec IC60

SANITEC IC60 is a range of resin baseboards created for hygienic connections between floor and wall covering or between two walls, particularly in the healthcare, chemical and food fields. Designed for application on existing surfaces, they can be used for renovations and retrofitting of previously built public buildings, because they meet current regulations. Shaped outer edges ensure perfect adhesion of the profile to the substrate.

interjolly IJ

INTERJOLLY IJ profiles optimize wall-to-floor tile transitions while allowing differential movement. The perforated flange installed behind the wall tiling guarantees secure grip. This cove-shaped profile is hygienic, easy to clean and can replace silicone caulking around shower stalls and bathtubs.

wallprotection WA

Synthetic resin corner protection profile, through-coloured to hide the effects of wear and damage. The smooth surface makes it easy to clean and more hygienic than traditional baseboards. Available in colours and a range of dual-coloured options. Together with an aesthetic value the dualcolour effect with a darker colour in the central part improves its resistance to trolleys and stretchers passage. These corner protection profiles can be perfectly co-ordinated with the other profiles in the wallprotection range - wall protection strips (WP) and baseboard (WB).
