

Perimeter profiles for terraces

PROFILITEC offers a complete range of multipurpose perimeter profiles for balconies and terraces. These elements are produced in stainless steel and powder-coated aluminum. They are available in seven different colors, and are a first-rate alternative to traditional natural stone thresholds and ceramic tile angle profiles. This product line proposes contour, transition and trim profiles for finishing tile edges as well as innovative terrace and outdoor floating floor systems.

bordertec

BBS-BCS

This is a perimeter profile for the finishing and protection of the external tile border. It also has an upper edging trim designed to frame tiled surfaces where they are laid flush with the screed.

BBS55IS

Length: 2,70 meters

** 10% increase for quantities lower than those indicated.

bordertec BD

BORDERTEC BD perimeter profiles are used for the finishing of terrace edges that allow for a perfectly levelled mortar bed installation. They are available with perforated drainage hole openings (used with DRAINTEC 8 matting) and without hole openings (for a waterproof terrace edge). The tiles can be installed flush against the profile or sit directly on the profile.

BD55A22

Length: 2,70 meters

BD - Aluminum (with draining holes)
H1 = 18 mm

BD - Aluminum (without draining holes)
H1 = 18 mm

It is recommended to use FIXXTEC multipurpose adhesive to bond the product. For further information, see page 302.

bordertec BHS

BORDERTEC BHS is a perimeter profile that finishes and protects the exposed concrete edge of balconies and terraces for 20 mm thick paving that incorporates an upper notch for terminating and containing the pavers when the border is laid flush with the screed. Designed with a "drip-lip" for water management. The BHS profile has a protruding drip edge, which also protects the Drintec 8 drainage membrane that can be placed under the screed and above the waterproofing layer. Leave a suitable space between the different elements to allow for thermal expansion and treat the gap with the joint element.

bordertec BTR

BORDERTEC BTR is an innovative modular solution suitable to finish and contour balconies and tiled terraces. The profile ensures a modular solution which can match with the most popular tile sizes and finishes for external use. Bordertec BTR mounts with the additional modules series TR, which slide into the basic module track allowing it to adapt to any tile thickness. Clip system: profile=tile thickness- 2 mm.
