## The company

### **A PARTNER. YOU DON'T NEED JUST A SIMPLE SUPPLIER**

There are many suppliers out there, but only a few are partners who stand right by your side. How are we your partner? By studying your needs and offering solutions and systems that resolve real problems. We make products for the installation of wall and floor coverings that are easy to use, durable, versatile and with undisputable quality, whilst guaranteeing fast delivery times, offering punctual and reliable assistance, collaborating with you to personalize products and solutions which other companies, be it because of size, lack of production organization or manufacturing capability, are not able to provide. All this because we know the job of the installer, the reseller, the architect and the contractor, each one with their own specific needs and priorities.

### **EXCELLENT LOGISTICS: NEVER WAIT FOR YOUR PRODUCTS**

Millions of meters of profiles in the warehouse, ready for delivery, aiming to process all of your orders within 48 hours. This means that we're able to give you the right product, at the right time, at the right place (even at the job site), in the quantity and timing you prefer. It's a supply chain you can count on, with precise delivery worldwide: we serve more than 10,000 clients in 90 countries with 7,000 products.

## Quality and environment

Profiltec has implemented and applies a quality and environmental management system in accordance with UNI EN ISO 9001:2015 and UNI EN ISO 14001:2015. It's an organizational model capable of continuously measuring and improving business and environmental performance.

The choice of attention to the environment has also led to EDP (Environmental Product Declaration) certification in accordance with ISO 14025 and EN 15804:2012+A2:2019, as a demonstration of commitment to increasingly reduce CO2 emissions to the environment from its products.

## Pedestals for raised floors

# up+tec®

Pedestals for raised floors with an integrated switch from self-leveling to fixed head.

# up+tec® FX

Fixed head pedestals for raised floors.

## Pedestal system for raised floors

The installation of a raised floor offers benefits beyond mere aesthetic function.

Easy to install and remove, can be easily replaced when needed, and adapts to the specifics of the ground.

It requires no drying time before being accessible. Once installation is complete, the flooring can be used immediately.

Some base surfaces are perfectly leveled, while others have irregularities, such as slopes or small elevation differences. The use of a raised floor system makes it possible to overcome these peculiarities and irregularities in the ground, simply by adjusting the height and using the self-levelling function of the supports.

The system is ideal for creating raised floors outdoors such as balconies, gardens, pool edges, porches and public places.

Raised floors are ideal for hiding pipes and electrical systems, they promote rainwater runoff because the tiles laid on the supports are not bound by concrete. In this way, during heavy rains, water can flow freely and the risk of water pooling is drastically reduced.

Raised floors completely avoid cracking, as constant exposure to temperature changes in bonded floors create severe stress through structural movements and dilatation created by temperature fluctuations.

It is safe and versatile, capable of bearing very high loads and offering ease of inspection, as the only thing to do is to lift the tiles without having to break them.

Raised floors also provide additional sound insulation from footstep sounds for the floor underneath.

# Applications

Terraces

Gazebos

Poolsides

Hot tubs

Roof decks

Gardens

Walkways

Bars and restaurants

## 3 products, 1 system

### Uptec SUPAL - Reduced height pedestal

The Uptec SUPAL pedestal is adjustable in height from 28 to 43 mm and can be combined with SUPA2, SUPA4 and SUPAW.

### Uptec SUPAS - Standard pedestal

The Uptec SUPAS pedestal is adjustable in height from 43 to 58 mm and can be combined with SUPA2, SUPA4 and SUPAW; SUPAR extension rings can be used to reach greater heights.

### Uptec SUPAR - Extension ring

Uptec SUPAR is a stackable ring used in combination with the standard SUPAS pedestal. Each extension ring is 30 mm high.

## 3 accessories for each configuration

### Uptec SUPA2 - Head with 2 mm tabs

The Uptec SUPA2 accessory is a two-component head: made of polypropylene for the tab and rubber for the head ensuring anti-noise and non-slip properties (ideal for creating 2 mm joints).

### Uptec SUPA4 - Head with 4 mm tabs

The Uptec SUPA4 accessory is a two-component head: made of polypropylene for the tab and rubber for the head ensuring anti-noise and non-slip properties (ideal for creating 4 mm joints).

### Uptec SUPAW - Head to be fixed on wooden joists

The SUPAW head is ideal for laying wood decking on wooden joists. Special grooves located along the tab allow quick attachment to the joist with standard screws.

## 3 products, 1 system

### Uptec SUPALFX - Low pedestal

The Uptec SUPALFX pedestal is adjustable in height from 28 to 43 mm and can be combined with SUPA2FX and SUPA4FX.

### Uptec SUPASFX - Standard pedestal

The Uptec SUPASFX pedestal is adjustable in height from 43 to 58 mm and can be combined with SUPA2FX and SUPA4FX; SUPAR extension rings can be used to reach bigger heights.

### Uptec SUPAR - Extension ring

Uptec SUPAR is a stackable ring used in combination with the standard SUPASFX pedestal. Each extension ring is 30 mm high.

## 2 accessories for every configuration

### Uptec SUPA2FX - Head with 2 mm tabs

The Uptec SUPA2FX accessory, is a bi-component head: made of polypropylene for the tabs and rubber for the head, it provides anti-noise and anti-slip performance (ideal for the creation of 2 mm joints).

### Uptec SUPA4FX - Head with 4 mm tabs

The Uptec SUPA4FX accessory, is a bi-component head: made of polypropylene for the tabs and rubber for the head, it provides anti-noise and anti-slip performance (ideal for the creation of 4 mm joints).

# Advantages of the uptec system

Due to its modularity the uptec pedestal makes the installation of the raised floor simple, easy and extremely fast, as any height can be reached with only 3 components.

The 3-in-1 system reduces the warehouse space and makes it easier to manage.

Uptec is designed to make work easier and overcome all the obstacles that can be encountered on the construction site, avoiding delays and product reorders for customers.

Ground irregularities and slopes of up to 5 percent will be compensated for with the uptec self-levelling head. (Only valid for uptec)

The uptec system covers all height ranges from 10 mm.

Unexpected height variations will be solved by adding/removing the SUPAR stackable ring.

The two-component head offers a choice of joint width with removable 2 mm or 4 mm tabs, and provides high anti-noise and anti-slip performance.

The SUPAK adjustment key is the perfect solution for precise height adjustments, during and especially after installation, without having to remove every laid tile.

Pre-cut lines on the base ensure precise placement of the pedestal in corners and along perimeters.

There are 3 kinds of perimeter profiles available with a wide range of colors that meet all aesthetic expectations to stylishly finish the edges of the installation.

# up+tec<sup>®</sup> GROUND

## Uptec ground is a series of pedestals used for reduced height raised floors

### SUPT / SUPT4 - Reduced height pedestal

Uptec ground is the adjustable pedestal ideal for lowest heights, starting from 10 mm up to 15 mm in height, which can be increased by using the SUPB extension. It's available with 2 mm (SUPT) and 4 mm (SUPT4) tabs.

The system is manually adjustable and does not require the use of an adjustment key.

### SUPB - Extension for SUPT/SUPT4 pedestal

Uptec ground SUPB is the extension of the SUPT minimum height support. With this stackable accessory, SUPT can increase the height from 15 to 30 mm. Each SUPB extension increases the height by 5 mm.

## SUPT & SUPT4

Height adjustment with 0.5 mm precision.

The desired height is clearly visible in mm.

## SUPB

To increase the height of SUPT/SUPT4 by 5 mm at a time.

Stackable extensions to reach greater heights.

## Accessories

### SUPACLPP - PERIMETER SPACER

The SUPACLPP perimeter clip is applied to the head of the pedestals that stand on the perimeter of the installation.

### SUPACLPB & SUPACLPT

The SUPACLPB clip is placed under the pedestal. The SUPACLPT clip is positioned above the pedestal.

SUPACLPT and SUPACLPB are used to make tile-enclosed perimeters.

### SUPAR120

Uptec SUPAR120 is a stackable ring used in combination with the standard SUPAS pedestal. SUPAR120 increases the height by 120 mm and can be used individually or with the SUPAR ring.

### SUPATG

SUPATG is a non-slip, noise-reducing rubber mat that can be placed under uptec pedestals to protect the floor underneath.

### SUPAK - 3 FUNCTION ADJUSTMENT KEY

Uptec SUPAK is the adjustment key that has three functions:

1. Switch from fixed head to self-levelling;
2. Removal of the tab spacers;
3. Height adjustment.

### SUPL2 & SUPL3

Leveling discs and noise reducers for uptec pedestals.

## Aluminum joist installation system

The combination options for laying patterns and flooring formats is notably increased.

Lightweight but rigid profiles that are easy to cut, easy to handle, easy to work with and provide an optimal result in terms of solidity and stability of the structure.

Weather resistant and durable over time. They provide exceptional longevity even in very humid environments.

Unaffected by mold growth and the action of a variety of insects.

Precise extrusion processes ensure the planarity and smoothness of profiles, simplifying the installation of raised floors on pedestals.

It offers the chance to use all the appropriate clips and screws or fixtures for a complete installation.

Aluminum joist is a 100% recyclable product, therefore limiting its impact on the environment.

# Advantages of SUPAANG240 aluminum joist

SUPAANG240 offers maximum freedom and flexibility in terms of tile sizes to be used and allows for floors with different laying options and various covering materials.

SUPAANG240 ensures maximum resistance for a solid, safe and quick installation.

Openings on the base ensure proper water outflow.

Openings on the base allow the height of the pedestals to be adjusted with the SUPAK key during and after installation.

SUPAANG240 comes with the anti-noise rubber bands already installed to save installers valuable time during installation.

Openings on the base ensure safe and stable attachment to the pedestal head.

## SUPAANG240 uptec accessories

### SUPDGD

Used in aluminum joist installations, SUPDGD2 and SUPDGD spacers allow 2 mm and 4 mm joints to be created.

### SUPAJG

Polypropylene joint designed to connect SUPAANG aluminum joists.

### SUPCLIPG

Locking clips for wood decking installation on outdoor aluminum joists.

### SUPACLPT

The SUPACLPT perimeter clip delimits the perimeter of the installation on the SUPAANG240 joists.

## EPD Certification

Uptec is EPD certified. In building assessments, building products are evaluated through environmental product declarations (EPDs) conducted in accordance with ISO 14025 and EN 15804:2012+A2:2019.

The analysis evaluates the life cycle of the Uptec system and measures it in terms of carbon footprint with independent third-party verification of the statement and data, according to ISO 14025:2006. A series of case studies have shown that Uptec has an improvement of more than 70 percent in terms of carbon footprint over traditional methods of exterior floor assembly, such as glued tiles on a lightweight screed.

# EPD

## CERTIFICATION

# supatray

Uptec supatray, the pinnacle of innovation in raised floor solutions, meticulously engineered to surpass all expectations. It is designed to provide unparalleled versatility and durability, setting a new standard in safety and performance. Supatray features a honeycomb structure, designed to offer a robust substructure that not only safeguards against injuries in the event of tile breakage but also ensures exceptional stability. With dimensions measuring 598 x 598 x 38 mm, supatray creates a solid foundation for any raised floor project. Made with recycled ABS plastic material, supatray withstands the test of time and the most challenging weather conditions. In addition, four galvanized steel reinforcement profiles are strategically placed on all sides of the supatray enhancing its load-bearing capacity and minimizing bending. These reinforcements come pre-assembled, saving precious time and simplifying the installation process. Supatray creative freedom knows no bounds. It guarantees the creation of stable and flush substructure, allowing imagination and creativity for installations including various tile sizes and patterns with ease.

Supatray with four reinforcement profiles pre-mounted

**SUPATRAYLOCK**  
to be used with SUPA4 and  
SUPA4FX

**SUPATRAYTAB2 and SUPATRAYTAB4**  
for 2mm 4mm joints

ABS recycled plastic and galvanized steel

LxB = 598 x 598 mm  
Height = 38 mm

ACCESSORIES:

**SUPATRAYLOCK**  
(optional)

**SUPATRAYTAB2**

**SUPATRAYTAB4**

ADVANTAGES:

**Ultimate Safety**

Unmatched protection against injuries in the event of tile breakage, providing peace of mind.

**Indestructible Strength**

Engineered with four galvanized steel profiles, rendering it highly resistant against structural challenges.

**Effortless Installation**

Revolutionizes installation with convenient 598x598 mm dimensions, drastically reducing time and labor costs.

**Perfection in Precision**

Achieves perfectly level flooring surfaces and offers the possibility for pedestal height adjustment using the SUPAK multifunctional key for absolute precision.

**Limitless Creativity**

Unleashes boundless creativity, enabling the creation of multiple installation patterns with various tile sizes.

**Tailored Adaptability**

Can be easily cut to offer individual customization options for curves, recesses, and small edge sections.

**Efficient Drainage**

Guarantees drainage efficiency, ensuring rapid water dispersal through joints and its cavities.

**Stability Standard**

SUPATRAY is securely connected together by the SUPATRAYLOCK plastic locking disc, ensuring uniformity and maximum stability.

**Sustainability**

SUPATRAY incorporates recycled content and embraces full recyclability, leading the charge towards a greener future.

## CALCULATOR

[www.profilitec.com/uptec-configurator](http://www.profilitec.com/uptec-configurator)

**Uptec pedestal calculator is an online tool to create your own raised floor and calculate the number of supports required for the project**

You can design the area or upload an architectural sketch, choose from an extensive list of tile sizes, select the width of the joints, and set the desired height of the pavement.

You can choose between a classic installation on pedestals or an installation with aluminum joists or with antifragementation tray in which all the needed accessories for a complete installation are included.

The uptec media calculator automatically determines which and how many pedestals/ accessories are required for the project. It is an easy and intuitive tool that offers a wide range of functions to facilitate your work.

# support 80

This is a polypropylene support for laying raised tiles and other floor coverings. It offers good resistance to frost and atmospheric agents. It is an easy to use system that can adjust the covering to different heights thanks to the available shims. Ideal for large balconies, terraces, verandas walkways and roof gardens. Placed directly onto the sloping bituminous waterproofing layer they provide an effective drainage system and ensure maintenance of the waterproofing layer over time.

# bordertec BSR

The bordertec BSR is recommended to contour marble and stone balconies and terraces with a water-run-off finishing element. Its reversible section allows to match two different tiles thicknesses with the same reversible profile. Bordertec BSR is equipped with the necessary accessories for a proper installation.

# bordertec BSJ

Bordertec BSJ is engineered to delimit the perimeter edges of a raised floor or to create a step (in this case we recommend the application of the SWH carborundum anti-slip adhesive strip). Bordertec BSJ has a decorative visible part of 2 cm. To install the bordertec BSJ profiles, the vertical tile fits into the groove of the profile giving a continuous finishing between the horizontal and the vertical cladding.

BSJ 20 A50

Length: 2,70 meters

# draintec 8

DRAINTEC 8 drainage system provides a drainage layer within a mortar bed while maintaining high load resistance. It is extremely resistant to compression, traction, impact and puncturing; it also ensures perfect mechanical protection of the waterproof layer while being relatively thin at only 8 mm thick. DRAINTEC 8 has a double drainage channel that also fully compensates for hydrostatic pressure, to allow the free passage and management of water within the mortar layer. DRAINTEC 8 drainage system is "loose-laid" onto the sloped waterproof layer. The mortar bed screed layer is then placed over Draintec 8 drainage membrane.

DRAINTEC 8 can be easily cut with normal shears.

Benefits of applying the DRAINTEC 8 system:

- It guarantees less wear on the tiles
- Protects the primary (roofing) waterproofing membrane from damages caused by the aggregates in the mortar screed layer.
- Reduces the presence of efflorescence
- Eliminates hydrostatic pressure
- Contributes acoustic insulation (sound transmission) by providing an 8 mm air gap

## STRATIGRAPHY

# draintec 8S

DRAINTEC 8S drainage system provides a drainage layer within a mortar bed while maintaining high load resistance. It is extremely resistant to compression, traction, impact and puncturing; it also ensures perfect mechanical protection of the waterproof layer while being relatively thin at only 8 mm thick. DRAINTEC 8S has a double drainage channel that also fully compensates for hydrostatic pressure, to allow the free passage and management of water within the mortar layer. DRAINTEC 8S drainage system is "loose-laid" onto the sloped waterproof layer. The mortar bed screed layer is then placed over Draintec 8 drainage membrane.

DRAINTEC 8S, can be easily cut with normal shears. Membrane with 2x2 mm synthetic mesh, ideal for laying floors on draining screed.

Benefits of applying the DRAINTEC 8S system:

- It guarantees less wear on the tiles
- Protects the primary (roofing) waterproofing membrane from damages caused by the aggregates in the mortar screed layer.
- Reduces the presence of efflorescence
- Eliminates hydrostatic pressure
- Contributes acoustic insulation (sound transmission) by providing an 8 mm air gap

# fixxtec

FIXXTEC is a multipurpose adhesive suitable for sealing and waterproofing the joints of FOILTEC membranes. It is also suitable for bonding a wide range of products, such as baseboards, expansion and connection joints, hygienic coves, transition profiles, etc...

FIXXTEC can be applied to both wet and underwater surfaces, acting as a waterproofing adhesive and sealant.

FIXXTEC is the perfect solution for bonding porcelain pavers onto the SUPATRAY.

## MUD - MUDR

Multidrain is a waterproof modular system for linear drainage of surface water. It can be used in tiled structures, outdoor and indoor. The system is made of PP (Polypropylene), a light but resistant material, and is composed of 1,48 meter long combinable channels with lateral or central run-off pipes. The channels internal slope functions as water run-off and is self-cleaning. The system permits even floor tiling with great time saving. The channel has a pre-felted fabric on its edge, allowing the installation of waterproofing systems (thin bed installation). The grid frames are made of stainless steel AISI 316L. The system is equipped with run-off pipes, end pieces and grids in stainless steel AISI 304. Note: On request the grids can be supplied in stainless steel AISI 316L. The channel can be inspected.

Maximum system length: MUD 9,20 m - MUDR 6,25 m

# spacers DISC

ABS tie-bases for laying on stone or draining screed, for natural stone outdoor floors, concrete tiles or ceramic tiles. They can be used in different types of laying, dry, running or irregular laying. The product is made of ABS material resistant to UV rays and temperatures. It is transparent in such a way as to be invisible if the crushed stone is moved. At the base they have holes to facilitate water drainage. The tie-bases, thanks to the predefined breaking points, are easily adaptable to the various needs, obtaining central, corner or terminal tie-bases according to the need.

# General terms and conditions:

## 1. EFFECTIVENESS OF THE GENERAL CONDITIONS

These general conditions of sale, hereinafter "General Conditions of Sale", regulate all contractual relations for the sale of products (hereinafter "Product / s" or "Goods / s") concluded by the company Profilitec S.p.A. (hereinafter "Profilitec") with its customers (hereinafter "Buyer" or "Customer / s" and, jointly with Profilitec, "Parties"). The General Conditions of Sale are applied to the individual sales contracts stipulated by Profilitec with its Customers (hereinafter "Contract / s") even if not expressly referred to, and / or signed for acceptance, in the individual Contracts. Any special provisions contained in the individual Contracts, which derogate from the provisions of the General Conditions of Sale, prevail over the latter. These General Conditions are effective until they are replaced by new General Conditions, it being understood that the new General Conditions of sale apply only to Contracts entered into after their entry into force. The General Conditions of Sale constitute the only conditions applicable to all Contracts, thus prevailing over any other conditions applied by Customers and third parties - which Profilitec declares herewith not to accept - and cannot be waived except as separately stipulated in the Contract or a specific written agreement between the Seller and the Customer.

## 2. ORDER

The Goods object of each sale between the Buyer and Profilitec are described in the order form (called "Sales Order Confirmation" or with equivalent wording, hereinafter "Order") prepared by Profilitec for each Product request received by the Customer, indicating the type of Products ordered and, for each Product, the quantity requested. The Order must be signed and transmitted by the Buyer - directly or through its representatives - to Profilitec.

## 3. CONTRACT

The Contract is understood to be entered into between Profilitec and the Customer when Profilitec receives the Order signed by the Customer or, in the absence of this and written communication of dispute of the Order by the Customer, once 1 working day has elapsed from the date of transmission of the Order Confirmation by Profilitec to the Customer. Following the conclusion of the Contract, the Customer cannot refuse to accept the Products (except as otherwise provided for in articles 8 and 11) and / or withdraw from the Contract.

## 4. PRICES

The prices of the Products, expressed in euros, are those indicated in the Profilitec price list in force on the date the Order is sent, subject to different prices negotiated between the Parties and resulting from the Contract. In any case, Profilitec reserves the right at any time to update the price list, without notice, it being understood that - unless otherwise agreed between the Parties - any update of the existing price list will be applied to the Orders sent to Profilitec starting from the date of entry into force of the new price list. The prices of the Products referred to in the Profilitec price list are net of (i) taxes, duties, or other charges that may affect the Products and (ii) transport and installation costs of the Products, which will be quantified from time to time by Profilitec and charged to the Customer.

## 5. PAYMENTS AND EXPENSES

Payments must be made by the Purchaser in the manner and within the timeframe established in the Contract or, in the absence of provisions of the Contract in this regard, by bank transfer within 30 days from the invoice issue date. Any negotiations, offers, sales, endorsements, collections, rebates made by Profilitec agents or intermediaries are not valid unless authorized in writing by Profilitec. For Orders of less than € 200.00 the following additional costs are charged to the Customer: € 12.00 for shipments to Italy, € 15.00 for shipments to EU countries and € 30.00 for shipments to extra-EU countries. Customers incur an administrative fee of € 15.00 for overdue payments of invoices. Further, in the event of late payment of invoices, even partial, the Customer incurs interest on arrears as per Article 5 of Legislative Decree 231/2002, as amended and / or supplemented from time to time, starting from the expiry date of the term for payment and without the need for prior notification to the Customer. The non-payment, even partial, of any sum due by the Buyer, or the total or partial non-fulfillment of contractual obligations or agreed conditions by the Buyer for the supply of products by Profilitec, authorizes the latter to suspend the execution of further supply of products under existing Contracts (also if different from the one affected by the non-fulfillment) and / or to subordinate its execution to the issue of adequate payment guarantees by the Buyer, albeit without incurring any responsibility in doing so.

## 6. TERMS OF DELIVERY AND TRANSPORT

The terms of delivery of the Goods shall be agreed from time to time and reflected in the Contract. In the absence of provisions in the Contract in this regard, the delivery time is 30 (thirty) days from the issue date of the Order Confirmation. The delivery terms are indicative, not essential for the Customer and not binding for Profilitec. Unless otherwise agreed between the Parties and stipulated in the Contract, the delivery of Products is ex works at the Profilitec warehouse. At the request of the Customer, Profilitec arranges transport and delivery of the Products, with related costs and charges being charged to the Customer, as indicated in Article 5 of the General Conditions of Sale. Profilitec is entitled to anticipate or postpone the delivery of all or part of the Products, without this giving the Buyer the right to request the total or partial termination of the Contract, nor the payment of compensation or damages. The Buyer may not refuse delivery of the Products even if delivery terms have expired. At the request of the Buyer, Profilitec is able to offer an express delivery service. The price increase due for the express delivery service is indicated in the Order. However, express delivery is only available for packages up to 2.8 meters in length. Packages longer than 2.8 meters travel exclusively by normal courier (not express) and their shipment incurs a fixed surcharge of € 35.00 in the form of extra transport costs. If the Purchaser, with the exception of cases referred to in Article 8 of the General Conditions of Sale, refuses to receive delivery of all or part of the Products, Profilitec remains entitled to the full payment agreed in the Contract, or alternatively may terminate the Contract pursuant to Article 1456 of the Italian Civil Code, without prejudice to the right to compensation for damages. If the Parties expressly agree in the Contract that the delivery of the Product must take place ex works at the Profilitec warehouse and the Customer does not collect the Product within 2 days from the date on which Profilitec has made it available, the Customer is deemed to have refused to receive delivery of the Product, thereby submitting to the provisions of this clause. In this case, as well as in the event of unsuccessful delivery of the Product due to a cause attributable to the Customer, any liability for Profilitec for risks and costs deriving from, or inherent to, with the storage of the Goods being excluded, shall be borne entirely by the Buyer. In this case any advance payments made by the Customer are considered compensation to Profilitec as penalty for failure to collect the Goods or, if applicable, for failure to deliver the Goods for reasons attributable to the Customer. In case of delay in the delivery of the Products due to force majeure (such as, by way of example and not limited to transport interruptions, delays or non-delivery of materials by suppliers necessary for the production of the Goods, a significant increase in costs and / or unavailability of raw materials or semi-finished products used in the production of Goods, war, insurrection, acts of terrorism, sabotage, piracy, currency restrictions or commercial exchanges, embargoes, etc.), Profilitec is entitled, at its own discretion and promptly notifying the Customer, to extend the delivery term for a period equal to the duration of the force majeure or to withdraw from the Contract, excluding any and all liability of Profilitec towards the Customer in relation to delays or non-delivery.

## 7. TECHNICAL INDICATIONS

All specifications, technical data, samples, drawings and photographs of the Products are purely indicative and therefore not binding for Profilitec. When purchasing Profilitec Products and adopting the recommendations and suggestions contained in its documentation, the Purchaser must ascertain that the requested Products are appropriate given his specific requirements. The choice of Product and its use in the context of a specific installation assembly is the sole risk and responsibility of the Purchaser. Profilitec reserves the right to make changes to the Products (without altering their essential characteristics) and to their packaging without prior notice.

## 8. REPORT OF DEFECTS

The Products purchased must be verified and checked by the Buyer upon receipt. Any apparent shortcomings and defects in the Goods supplied (i.e. defects identifiable with diligent visual inspection upon receipt of the Product) must, under penalty of forfeiture, be contested by the Customer to Profilitec no later than 5 (five) working days from the date of delivery of the Goods, by registered letter or certified email. After this deadline, the Products will be considered for all intents and purposes compliant with the Contract and free from obvious defects and therefore accepted without reservation by the Customer. Any hidden defects of the Goods (i.e. defects that cannot be identified by diligent visual inspection upon receipt of the Product) must be notified by the Purchaser to Profilitec, under penalty of forfeiture, by registered letter or certified email within 5 (five) working days from the discovery and, in any case, no later than 12 (twelve) months after delivery. It is understood that in the event Products that have displayed apparent defects are used or installed, this excludes the possibility of disputes or complaints regarding the defects themselves, resulting in full acceptance of the Products.

## 9. RESERVE OF OWNERSHIP (Article 1523 of the Italian Civil Code)

The sale of the Products takes place with retention of title in favor of Profilitec until full payment of the agreed price. Failure to comply, even partially, with the agreed payment conditions allows Profilitec to proceed with the recovery of unpaid Products, even if sold to third parties. During the period in which a Customer's agreed price for Products delivered remains unpaid, the Customer is obliged to keep such Products safe and remains liable for any damage to these Products.

## 10. WARRANTY AND LIMITS

Profilitec provides the Customer with legal guarantees with reference to the Products sold, unless otherwise provided for by the Contract and / or by the General Conditions of Sale. Profilitec is not liable in the event of improper installation and / or use of the Products by the Customer or third parties. Except as provided for by law, in the case of supply of defective Products, the Customer who has promptly reported the defect in accordance with provisions in article 8, is entitled to the replacement of the Product at Profilitec's expense excluding any further compensation and / or remedy. The warranty does not cover (i) aesthetic defects of the Products, e.g. differences in finish or tone in the external appearance of the Product; (ii) normal wear and tear of the Products; (iii) problems resulting from non-compliance, even partial, with the rules, instructions and recommendations contained in the instruction manual and / or in the Product data sheet; (iv) damage caused to the Products by maintenance and / or cleaning with unsuitable products and / or materials; (v) damage resulting from inappropriate selection of the Product given the Customer's requirement. Furthermore, the warranty does not extend to faults and / or defects due to tampering and / or improper use and / or incorrect installation and / or unsuitable storage of the Products and / or due to force majeure. Profilitec declines all responsibility for any damage that may, directly or indirectly, derive to persons or property as a result of failure to comply with all the requirements indicated in the specific documentation accompanying the Products, including the warnings on installation, use and maintenance. No warranty and no remedy, both conventional and legal, other than those provided for by the Contract and the General Conditions of Sale may be invoked by the Purchaser, in particular being expressly excluded any liability assigned to Profilitec for loss of earnings, direct, indirect, incidental damages that may derive from defects, defects and / or non-conformity of the Products, with consequent express and irrevocable renunciation by the Purchaser, within the maximum limits permitted by current legislation.

## 11. RETURNS

Without prejudice to the provisions of article 10 above, returns of Products are only accepted if previously agreed in writing between the Parties. A return request must be sent in writing to Profilitec and must include, as an attachment, a copy of the invoice and / or transport document relating to the Products to which the return refers. Unless otherwise agreed in writing between the Parties, for each return made pursuant to this clause, Profilitec will charge the Purchaser € 30.00 as an administrative cost and - following acceptance of the return - will issue a credit note in favor of the Purchaser for a value corresponding to 80% (eighty percent) of the price invoiced to the Customer with reference to the returned Product. Returns are accepted only if the packaging and the Products are intact and sealed as in origin. Any costs of new packaging will be charged by Profilitec to the Buyer. Transport costs incurred for the return are borne by the Buyer.

## 12. INDUSTRIAL AND INTELLECTUAL PROPERTY

Any intellectual property right and / or design, production and commercial technology of Profilitec, whether or not registered and / or patented, must be treated as confidential by the Buyer and must not be used, reproduced and / or disclosed by the same without prior written authorization by Profilitec. All documents (including price lists, catalogs and other similar documents, in paper or digital form) relating to the Products are the exclusive property of Profilitec and cannot be reproduced by the Customer, even partially, without prior written authorization by Profilitec. The Customer is prohibited from any unauthorized use of Profilitec trademarks, logos and distinctive signs as well as any other trademarks, logos and distinctive signs shown on the Products and / or related to them, as well as the use of names and / or signs badges and / or patents and / or models and / or drawings relating to the Products.

## 13. PRIVACY

In respect of the provisions of art. 13 of the European Data Protection Regulation n. 2016/679 (GDPR), the execution of these General Conditions of Sale, may lead to personal and contact information being shared between Profilitec and the Purchaser, or in any case made available to their respective persons, (e.g. contact details, company email, company phone) of directors, employees and collaborators who, in relation to the tasks and duties assigned, manage and / or execute the Contract. Profilitec and the Buyer undertake to process such personal data to the extent that they are strictly necessary for the execution of all aspects of the Contract. Profilitec shall store this information for the entire duration of the Contract and beyond for the fulfillment of all legal obligations, in compliance with the statute of limitations for the rights involved. Profilitec and the Purchaser are, each independently, Data Controllers of personal data in their respective fields in the context of the execution of the Contract.

## 14. APPLICABLE LAW AND JURISDICTION

The law applicable to these General Conditions of Sale and to each Contract concluded between Profilitec and the Buyer is exclusively the Italian one. For any dispute that may arise between the Parties relating to these General Conditions of Sale and / or to each Contract (including those relating to their interpretation, validity, effectiveness, execution and resolution) is the exclusive competence of the Court of Vicenza.
