

# bordertec BSS

Aluminum perimeter profile for finishing and protecting tile edges on balconies and terraces. Its flat shape with minimal volume makes it particularly suitable for use with railings or in confined spaces. The internal ribbing ensures uniform installation, guaranteeing a constant distance of 10 mm from the screed. The lower part has a micro-drip end, designed to protect the screed without resorting to unaesthetic protrusions. Designed for adhesive installation, Bordertec BSS is available with all the special pieces necessary for a professional installation, ensuring a high-level technical and aesthetic result.

BSS12/53A50

Length: 2,70 meters
