

Baseboard

PROFILITEC offers a wide range of technical baseboards and are first-rate alternatives to traditional wood, rubber or ceramic baseboards. Designed as aesthetic yet technical elements, the modern line of aluminum baseboards are durable and resistant to humidity.

An internal cavity acts as a channel for low voltage cabling such as telephone, TV and computer wiring.

An innovative “two-tone” baseboard is available in a variety of chromatic variations and matches most material finishes.

Coordinated “two-tone” wall protection rails. Particularly suited for public settings.

PLANO is the latest member of the baseboard family. Fully integrates into the wall surface, creating a seamless contemporary baseboard look.

baseboard BAR

Decorative baseboard with multi-line ribbed effect in the visible part which matches the decorative standard of kitchen furniture. Available either with or without self-adhered backing. Long lasting and elegant finish. The profile contoured ends give a snug fit on the wall covering over the bottom perimeter.

baseboard BAS

BAS baseboards are designed to meet the modern minimalist design in which all elements perform their function by integrating with each other in a discreet but effective form. The profiles feature a rectangular section available in 3 different heights to meet any aesthetic requirements.

BAS baseboards also feature a groove in the non-visible section to facilitate bonding and avoid adhesive smears during installation. The profiles have corner and end capsules that fit into the profile, creating a pleasing effect of continuity.

baseboard BI

This anodized aluminium skirting profile is easy to install and can also be used to conceal cables or protect wires while providing an elegant baseboard finish. The internal interlocking support piece is fixed to the wall with screws. This profile is ideal for office environments that have both aesthetic requirements and require solutions for telephone and computer wire passage.

baseboard BFW

PLANO BFW is a profile conceived to make wall base of the same material used for the floor (ceramic or wood) and create a flush installation with the gypsum wall board. The back profile remains invisible and works as bis support enabling the skirting element (ceramic or wood) to be adhered. This skirting product is designed to coordinate with the most popular varieties of gypsum wall board.

plano BF

Patented Plano Design baseboards are designed to fully integrate into the wall, becoming a smooth level transition between the wall and floor covering. The base track is installed into the wall structure, flush with the plaster or drywall; the finishing profile seamlessly interlocks into the base. A horizontal, 5mm gap between the wall and finishing profile is a distinctive design element that also adapts to floor level differences of up to 5mm. Plano Design, a modern design system.

plano PS

The PS Plano baseboard, made of aluminum, is available in two heights (70 and 100 mm), in both powder coated and anodized finishes, and is suitable for applications of plasterboard panels directly into walls. The profile, which has multiple installation heights and panel thicknesses, is easy to apply using FIXXTEC, the specific adhesive in a cartridge, or by fixing with screws. The innovative geometry makes it particularly suitable for applications where a certain amount of space is required for the perimeter joint, while containing the curvature at the bottom to a minimum in order to maintain a clean appearance in the lines. The front panel also facilitates the possible placement of LED strips, should they be required by the designer.

plano PS130

Drywall is the most commonly used material in modern residential and commercial construction. PLANO PS130, a new, one-of-a-kind profile elegantly finishes drywall ceiling and wall installations. Its discreet, 13x13mm profile section perfectly edges drywall panels, becoming a minimalist design feature. At the floor level, the profile connects with the PLANO DESIGN BF baseboard for a fully integrated installation. The result is a profile that leaves a small gap of negative space, almost suspending the wall in mid-air.

plano PPS130

PPS130 aluminum profile.

Innovative and unique, the PPS130 profile represents a high-quality finishing solution for plasterboard applications. It combines functionality and aesthetics, enhancing any residential or commercial space. Thanks to its 13 mm cross-section, it integrates perfectly with the thickness of the most common plasterboard panels. It can be used as an elegant decorative element with LED strips at baseboard level, as a wall marker, or to illuminate ceiling perimeters, in line with the latest architectural design trends. The base acts as a joint cover, also ideal for wooden floors, while the front panel conceals the LED strip, creating a refined play of light and shadow that enhances any space.

PPS130AS

sanitec IC60

SANITEC IC60 is a range of resin baseboards created for hygienic connections between floor and wall covering or between two walls, particularly in the healthcare, chemical and food fields. Designed for application on existing surfaces, they can be used for renovations and retrofitting of previously built public buildings, because they meet current regulations. Shaped outer edges ensure perfect adhesion of the profile to the substrate.

wallprotection WB

Synthetic resin skirting, through body colored to hide the effects of wear and damage. The smooth surface makes it easy to clean and more hygienic than traditional skirtings. Available in colors and a range of dual-colored options. For sanitary benefits, the profile is coved which will allow for it to be "set-in" to the flooring using a cold weld procedure for a totally homogeneous finish. Thanks to the particular material composition and to the specific cavity at the bottom, this skirting can also be chemically welded to the PVC floor, as often required by hygiene standards. The WB skirting profile can be coordinated with the other profiles in the wallprotection range - corner protectors (WA) and bumper guards (WP).
