

jointec GAL

JOINTEC GAL aluminum sliding expansion joints are structurally designed to bear loads of large scale buildings or building compounds. They can be installed in the interstitial space between two sections of a building or between two bays. This technical joint links these interspaces, moving three-dimensionally to accommodate a building's structural and material settlement.

GAL500AN

Length: 4,00 meters

Aluminum

B = 95 mm nominal installation dimension
H1 = 70 mm nominal installation height
