

sanitec SB24

Hygienic cove shaped profile between wall and wall and between wall and floor. Connections between the wall and the bathtub, the shower tray or the kitchen surface. The silicones that are normally used lose their anti-mold properties after few months producing unsightly halos or stains. SB24 is easily applied with FIXXTEC on coverings, improves or restores the appearance of corners, making them more hygienic.

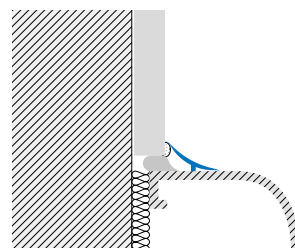

SB24P11

Synthetic Resin

Length: 2,70 meters

It is recommended to use FIXXTEC multipurpose adhesive to bond the product. For further information, see page 368.
