

covertec SP

COVERTEC SP is a profile designed to join two adjacent existing floors at the same height but it can cover imperfections in cutting or slight variations of height to be found on a tiled floor joining to a wooden one for example. Thanks to its shape, available in 3 different widths, this profile helps floor coverings to maintain the minimum distance thus acting also as a dilatation joint.

SP9AS

Length: 2,70 meters

SP9 - Aluminum
H = 4,5 mm

It is recommended to use FIXXTEC multipurpose adhesive to bond the product. For further information, see page 368.
